DETAILED ACTION

Reasons for Allowance

1. The following is an examiner's statement of reasons for allowance: The primary reason for the allowance of claims 1-7 is the inclusion of the limitations wherein the communication control device dynamically assigns the part of the protocol layer functions to each of the layer control devices and wherein the layer control devices supporting the respective part of the protocol layer functions perform respectively assigned processing tasks in sequence. The primary reason for the allowance of claim 8 is the inclusion of the limitations dynamically assigning the protocol layers to the respective layer control devices and performing operations of the assigned protocol layer by the layer control devices in sequence. These limitations are listed in there respective groups of claims. No prior art references included this limitation and it is seen as being nonobvious. This statement of reasons for allowance is based on the amendment, Paper Number 7 that was received on March 14, 2003.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Information Disclosure Statement

2. The information disclosure statement filed 10/10/2003 fails to comply with the provisions of 37 CFR 1.97, 1.98 and MPEP § 609 because there is no certification under 37 CFR 1.97(e). It has been placed in the application file, but the information

referred to therein has not been considered as to the merits. Applicant is advised that the date of any re-submission of any item of information contained in this information disclosure statement or the submission of any missing element(s) will be the date of submission for purposes of determining compliance with the requirements based on the time of filing the statement, including all certification requirements for statements under 37 CFR 1.97(e).
